

Enhancing Resilient Infrastructure: The Role of Climate and Disaster Risk Finance and Insurance

Enhancing Resilient Infrastructure: The role of Climate and Disaster Risk Finance and Insurance

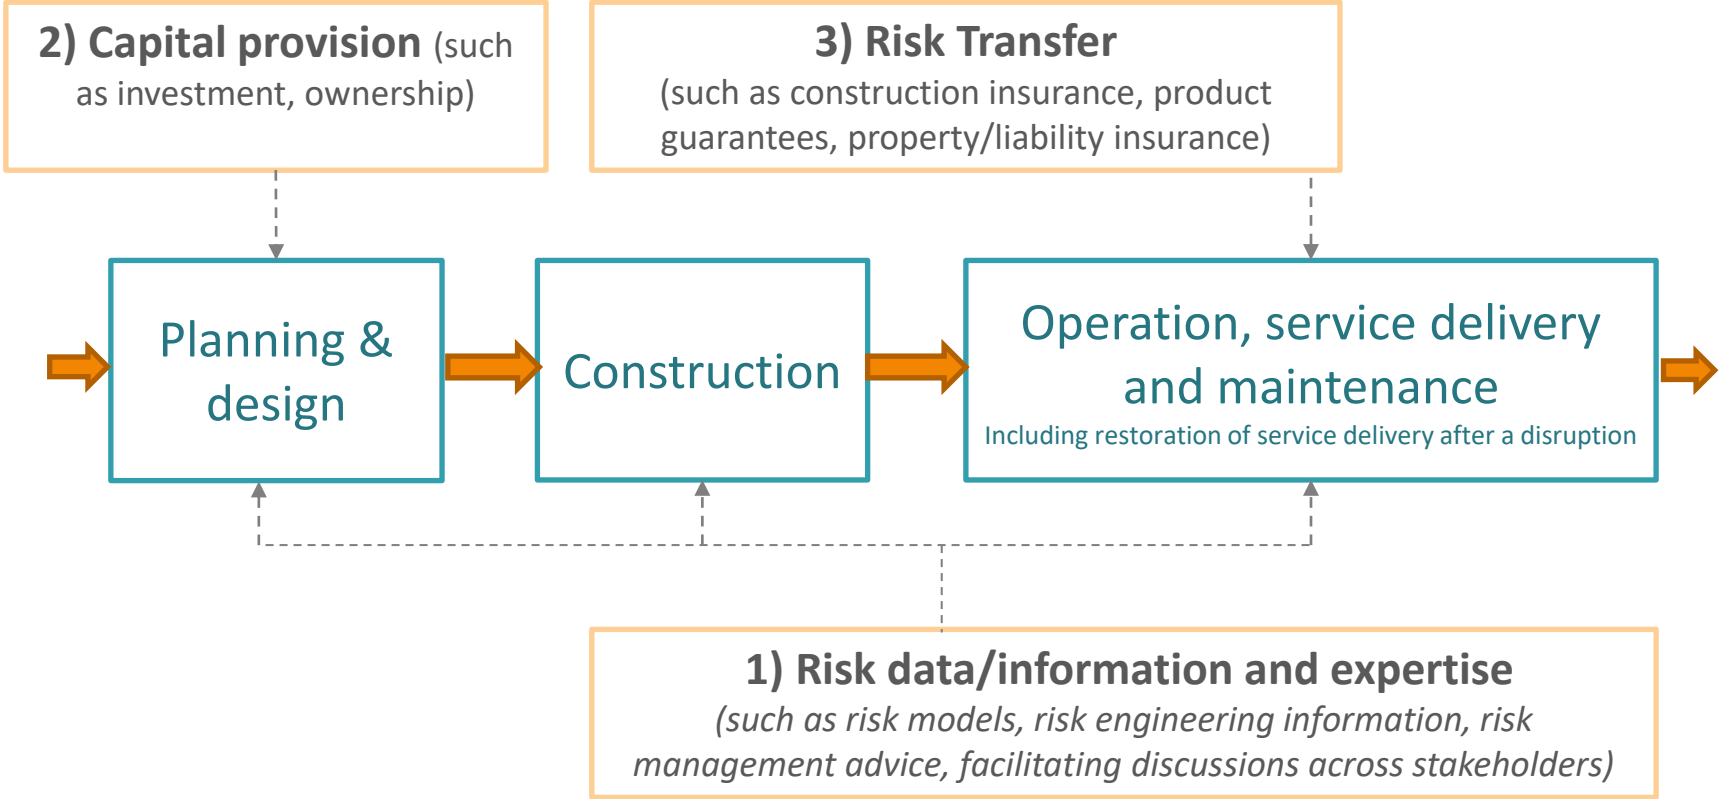

Risk Transfer

e.g. through climate
risk insurance

**Risk data /
information
and expertise**

**Investments /
capital
provision**

Resilient Infrastructure: The role of risk financing & insurance in infrastructure life cycle

-  Entry points for risk financing & insurance
-  Infrastructure projects life cycle

Actors for each decision phase can be public or private and can operate at a national or local scale, they can differ between contexts
Holistic solutions which integrate the three elements (capital, information, and risk transfer) would also be possible
